Brood Mares with their produce	1
Sires	26
Errata and Addenda to Volume 11	31

## ELIGIBILITY

Any horse claiming admission to the Barbados Stud Book, should be able:

to be traced in all lines of its pedigree to horses already appearing in earlier volumes of the Barbados Stud Book (Volume 1 of which was published in 1972) or the General Stud Book. Horses so appearing therein shall be designated “Thoroughbred” or

to prove satisfactorily eight recorded “thoroughbred” crosses consecutively including the cross of which it is the progeny and show such performances on the Turf in all sections of its pedigree as to warrant its assimilation with “thoroughbreds”.

to prove that it is the produce of a mating between sire and dam, (namely, the result of a stallion’s natural service with a broodmare which is the physical mounting of a broodmare by a stallion, and a natural gestation must take place in, and delivery must be from, the body of the same broodmare in which the foal was conceived. As an aid to the natural service, a portion of the ejaculate produced by the stallion during such cover may immediately be placed in the uterus of the broodmare bred (reinforcement).

In addition to the documentary evidence of a foal’s parentage the Barbados Stud Book may require further evidence by the use of parentage testing based on either:-

Blood typing; or

DNA Typing

## STATISTICAL ANALYSIS

The following is an analysis of live birth for the years 2012 to 2015

	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>
Colts	48	37	37	21
Fillies	39	36	35	22
Sex not given				
Total	87	73	73	43
